You are so far away but so often in my mind....

1. Great news from Ilia State University (ISU GE)!!

"Dear Partners, A lot has changed at ISU since our last meeting in Berlin. We have worked together with our lawyers and the financial team and have come to the decision to found an EUNET Center at Ilia State University. The center will be located and managed internally at ISU. We have decided not to found an association, as regarding Georgian legislation, the managing process would be followed by lots of difficulties, including the donation process, taxes, etc. We've communicated with the two other participants in Georgia - GTU and KU, they've also agreed that the center is a best option. We are glad to share that we are in the process of renovating an office space for EUNET Center. We have started the process of creating an entrepreneur alumni database and so far have found 40 members, who are happy to join us and share their experience with others. We have planned 5 events at ISU this year - the first one will be a foundation of EUNET Center, and the rest will be held on each faculty of our university: Business School, Faculty of Arts and Sciences, Engineering Faculty and the School of Law. The members of EUNET Center will participate in start-up workshops, seminars and a job fair organized by ISU in 2015. The potential members also agreed to co-work and assist students, working in ISU Business Incubator, on their innovative projects. We have also created a marketing plan for each event - the most influential TV channels and printed media will share an information about EUNET Center. Social media will be active as well. Later on, we will share all the material from the events held. Thank you!"
