*You are so far away and so often in my mind*

## 1. Monitoring visit for Ukrainian partners

## EANET newsletter # 15

---

The 1st of July our Ukrainian partners had a monitoring visit from NTO / NEO at KROK in Kyiv. According to the latest news everything went fine. Now we are expecting the finding of NEO to further improve our network and project.

### **2. Dissemination of EANET at HVA**

Next Monday 6th of July the EANET team of HVA will give a presentation about 1 year EANET project and what results have been accomplished. Representatives of different HVA departments will be present as well as some external stakeholders. We are expecting about 25 people.

Subject will be:

- How did we start and where are we now.
- When are Dutch alumni entrepreneurs interested in EANET
- There are always to business cases in a project like this:
  - 1. Above the table (where we talk about, what we say that we do)
  - 2. Under the table (what we think, what we really do, our real drivers)How to deal with this contradiction in our project?
- Update on PSC3 and training in Chernivtsi.
- ....

### 3. Evaluation of PSC3 and training

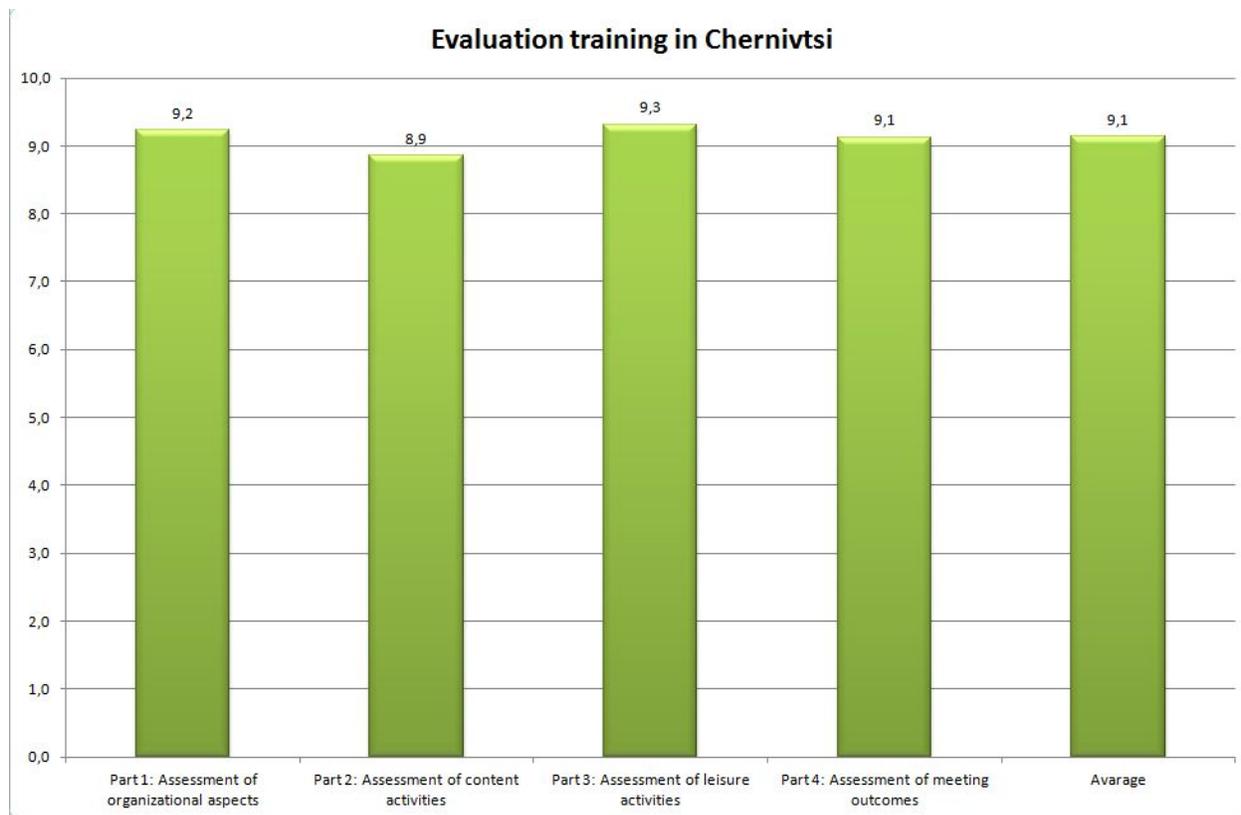

Every country has its own way of valuing. In Germany the best figure you can get is, as far as I know an A. In Holland the highest figure is 10 and the lowest 1. At EANET we rate our evaluation on a 5 point scale. If you want to show our evaluation to Dutch people it is better to translate it to a 10 point scale because that's the way they are used to look at figures.

So have a Dutch way of looking at our evaluation:

## EUNET newsletter # 15

Now the interesting part comes: how to interpret these figures.

**First of all** I am very glad with this evaluation and I think we are doing a fine job.

But also some questions come to my mind, like:

- If we would see the same graphic but then of the people who did not fill out the evaluation (about 40%), how would it look like?
- Within this project this is a self evaluation. How can we achieve that our customers (alumni entrepreneurs, staff at our HEI, EACEA, ..... ) will give us the same grade?

**Last of all** I am very glad with this evaluation and I think we are doing a fine job.

## 4. Elevator pitch of student entrepreneurs at HvA

Tuesday night 20:00 hrs in a popular bar in Amsterdam. About 50 teams began as startup in February they all developed their business, customers, product and mainly themselves. 10 of those 50 are invited to do their pitch with a jury of entrepreneurs/investors.

'Bornbright' were the close winners of this competition (<http://www.bornbright.nl/>) they had a very nice pitch but mainly offered a good proposition that is also scalable. They combine clothes with LED which is a hit in the USA. There guess is that they can also make it a hit in Amsterdam...The Netherlands...or even further.
